As always, thank you!!

As for the picture; just a picture of a container with the appropriate labels in the appropriate places...so I guess (just guessing since I'm still learning) if that means pesticide label and DOT label then that's what we're looking for; but don't quote me on that! Basically, we just want to be sure we're doing what is best for the client...it helps them and it helps us in that sense too.

Hi Joanne,

In terms of the picture, are you looking for a photo of a pesticide label or the DOT marking/label or both?

Here is a link to the pesticide label requirements in 40 CFR part 156:

- Go to: <http://www.gpoaccess.gov/cfr/index.html>
- In the lower menu on left side of page (under "Related Resources"), click on "e-CFR"
- Select Title 40
- In the fourth column "Browse Parts", select "150-189"
- Then select "156" in the first column.

The general requirements for labels (most of what I cited for you) are in §156.10. The container related instructions are in §156.140 - 156.159.

I hope that helps -

Subject: labeling

Hi Nancy,
Thanks for all your help regarding the labels; it appears I (we) have more questions. Again, any help you can give would be MORE than appreciated!!
Do you know where we can find a picture of a container that shows exactly where a label(s) should be located and what a label should look like? If there's a link or something, I'm happy to take it from there.
And lastly, can you send me more info regarding 40 CFR part 156 (more specifically the performance standards)? I searched (and searched) on the EPA.gov site and had no luck locating what I needed.
Thank you SO much!!
